

The Airone Tipó is a versatile canopy solution that comes in a variety of standard modular sizes to provide a temporary or permanent covering. Built to withstand the elements, the Airone Tipó will look good and perform well come rain or shine. Featuring an integral guttering system that will discharge rain water at ground level and the option to add padded protection around the base of the posts, it is a popular choice for golf clubs, residential care homes, schools, pubs, any public areas, hand car washes, playgrounds, smoking shelters and theme parks. The frame is constructed from galvanised and powder-coated steel which can be customised to a BS or RAL colour to match your brand or design, together with a canopy made from 650g/sm PVC which is completely waterproof, UV resistant and fire retardant to British Standards, as well as having anti-fungal properties.

Dimensions (mm)

Length	Depth	Height
3000	3000	2500
4000	4000	2500
5000	5000	2500
6000	6000	2500
7000	7000	2500
