

The Perennial Shelter is manufactured from high grade aluminum and so can be installed without the extra expense of purpose made concrete base. The Perennial is a versatile shelter, frequently used as an outdoor learning area capable of holding up to 30 children at a time. The Perennial Shelter also offers children a place to shade from the sun on hot days and is often used as a parent waiting shelter at the beginning and end of the school day. Frequently specified by community police officers, the Perennial also acts as a dedicated meeting place for youngsters helping to cut down on anti-social behaviour and crime.

Designed to be low maintenance and vandal resistant.

The shelter can be supplied in any colour(s) of your choice. Integral seating is manufactured from recycled plastics to have the appearance of wood but without the hazard of splinters.

Installation by our own qualified engineers.
